ABOUT ME

A proactive, self-motivated and detail-oriented Computer Science student with strong foundations in Java and problem-solving. Java and DSA enthusiast with growing command over the Full Stack Web Development, passionate about solving real-world problems through clean, modular, and maintainable code.

EDUCATION

Technocrats Institute of Technology, Bhopal

Sep 2022 – Present

B.Tech in Computer Science and Engineering CGPA: 7.97

Jawaharlal Nehru School, Bhopal

Class 12 (CBSE): 82% — Class 10 (CBSE): 9.2 CGPA

SKILLS

Languages: C/C++, Java

Web Tech: HTML, CSS, JavaScript, Node.js, Express.js, REST APIs, PostgreSQL, MySQL, React.js

Tools: Git, GitHub version control, Excel, VS Code

Soft Skills: Adaptable, Quick Learner, Critical Thinker, Problem solver, Active listener with strong communication, Teamwork.

PROJECTS

Sudoku Solver – JavaScript, DSA

Built a Sudoku solver using backtracking and recursion to solve constraint-based problems. Implemented input validation and logical checks to ensure correctness.

Public API Integration Project – JavaScript, REST APIs

Built a multipurpose web application integrating public APIs such as Harry Potter, Quotes, and Jokes. Focused on asynchronous programming, API consumption, and dynamic UI updates.

Book Notes Application – Node.js, Express.js, PostgreSQL

Developed a CRUD-based book notes application to practice relational database design and SQL queries. Implemented structured schema and backend validation for efficient data management.

Authentication & Security Module – Node.js, Passport.js, Google OAuth

Implemented secure login and signup functionality using Google OAuth. Practiced credential handling, session management, and secure authentication workflows.

Event Planning Web Application – MongoDB, Express.js, React.js, Node.js

Developed an event planning website for a startup. Worked on backend APIs and frontend integration while following version control and SDLC practices in a team.

Gaming Practice Projects – HTML, CSS, JavaScript

Designed browser-based games including Snake Game, Tic-Tac-Toe, Rock Paper Scissors Minus 1(Squid Game Version), and Whack-a-Mole using real-time logic and DOM manipulation.

COURSEWORK

- **Data Structures and Algorithms:** Arrays, Linked Lists, Trees, Recursion, Sorting, Searching etc.
- **Object-Oriented Programming (OOP):** Encapsulation, Inheritance, Polymorphism, Abstraction
- **Operating Systems:** Process scheduling, memory management, synchronization
- **DBMS:** ER modeling, normalization, transactions

CERTIFICATIONS

- Completed Java + DSA - Sheriyans
- Full Stack Web Development Course – Udemy

ACHIEVEMENTS AND ACTIVITIES

- Solved 350+ coding problems (LeetCode, GFG, CodeChef).
- Runner-up, *Battle of Brains – English Edition* (2nd of 35 teams).
- Secured 11th Rank out of nearly 700 participants in “Treasure Hunt – March Series 2026” (Unstop).
- Secretary, Music Society — Prime Member, Coding Club.
